

CUA20215 Certificate II in Creative Industries (Animation & App Design)

This qualification is delivered over one year under the auspices of Skills Strategies International Pty Ltd (RTO Code 2401)

What is Creative Industries (Animation and App Design) all about?

This is an interactive course utilising both Practical and theory components that will help unleash the creative potential of software packages used in the game design and animation industries at an introductory level. You will develop an understanding of animation principles using industry-based game design software; such as basic animation and game design skills, how assets and material for computer games are developed and the core graphic design skills used in the industry.

Career Pathways

Suited to students interested in further studies in creative industries such as digital media, graphic design, software coding design, animation, game design
